

Aryan Mishra

Product Manager | AI/ML & Technology Product Leadership

SRH Heidelberg, Germany | +91 9650087025 | aryanofficial0854@gmail.com | linkedin.com/in/aryan0854 | aryanmishra.online | github.com/Aryan0854

Summary

Product-minded engineer with hands-on experience leading feature scoping, cross-functional delivery, and stakeholder alignment across AI/ML, cloud, and full-stack product initiatives. Track record of translating ambiguous business requirements into shipped features across 6 organizations, driving measurable outcomes (30–400% efficiency and performance gains) through data-driven prioritization. Strong technical fluency in AI/ML, cloud infrastructure, and APIs enables direct collaboration with engineering while maintaining user- and business-outcome focus. Incoming M.Sc. candidate in Applied Data Science & AI (Heidelberg, Oct 2026).

Core Competencies

Product: Roadmapping & Prioritization, Requirements Gathering, Stakeholder Management, Cross-Functional Leadership, Agile/Scrum, User Research, Metrics & A/B Testing, Go-to-Market Support, Technical Specification Writing

Technical: Python, SQL, JavaScript | AI/ML (LangChain, RAG Systems, Model Evaluation, Azure OpenAI) | Cloud (Azure, Docker, Terraform, CI/CD) | React, FastAPI, REST APIs | PostgreSQL, Supabase | Git, Postman

Professional Experience

Infinite Computer Solutions (India) Ltd.

May 2026 – Nov 2026

AI/ML Intern – Iron Mountain Project

- Owned end-to-end development of an HR Screening Console that matched **114+ Corp Pool resources** against multiple JDs using a skill-family scoring engine across DevOps, Linux, Test Automation, and Full Stack
- Designed recruiter screening bands based on match scores: **<30% reject, 30–50% evaluate, 51–70% L1 screening, and ≥75% interview**, enabling consistent JD-to-resource evaluation
- Built automated Excel-based percentage matching and summary workflows that converted individual JD results into recruiter-ready **reject, evaluate, L1, and shortlist** categories
- Integrated a local **Qwen 4B** model through an OpenAI-compatible API for JD-to-profile analysis, reducing per-profile processing time from **30–90s to 12s (5–7× faster)**
- Implemented a persistent **Selected Pool** workflow allowing recruiters to analyze targeted groups (e.g., 8 Full Stack resources) instead of repeatedly processing the entire Corp Pool
- Developed and maintained the full-stack platform using **Next.js, TypeScript, React, Tailwind, Supabase PostgreSQL, ExcelJS, and local LLM infrastructure**, with authentication, API security, and role-separated Corp Pool/Employee Portal workflows

Capgemini

Feb 2026 – Apr 2026

Associate Infrastructure Consultant – Project Blue (Digital Solutions)

- Gathered and translated business stakeholder requirements into technical specifications for GenAI and cloud automation proof-of-concepts
- Drove prioritization of automation initiatives that measurably improved operational efficiency across infrastructure workflows
- Coordinated Azure infrastructure delivery with engineering teams using Terraform and Python-based automation

Xtelify Limited

Aug 2025 – Oct 2025

Data Research Intern

- Delivered 8+ data-driven research analyses that directly informed business decision-making
- Led workflow automation initiatives cutting manual effort by 20%, processing 50,000+ records and improving data efficiency by 30%

Gaia Smart Cities Solutions Pvt. Ltd.

May 2025 – Aug 2025

AI/ML Intern

- Coordinated delivery of 3+ IoT-enabled smart city automation modules across engineering and operations stakeholders
- Managed product reliability and monitoring requirements across data streams from 100+ IoT devices

ScanPick

Sept 2024 – Apr 2025

Full-Stack Developer Intern

- Owned end-to-end delivery of 3+ full-stack applications, from requirements gathering through launch, serving 200+ active users
- Defined API specifications and drove performance improvements, cutting load times by 35%
- Identified and automated internal workflow inefficiencies, saving 10+ hours/week for internal stakeholders

Subhansh Sewa Trust

May 2024 – Jun 2024

Volunteer – Program Coordination

- Led community program coordination reaching 500+ individuals, driving stakeholder engagement that grew donations by 15–20%

Key Product Initiatives

AI Resume Intelligence Platform (2026) – Scoped and shipped a production-grade resume analysis product (Next.js, TypeScript); defined evaluation heuristics across 6 product dimensions; containerized for self-hosted deployment. [GitHub](#)

Offline Multimodal RAG for Secure Document Intelligence (2026) – Defined product requirements for an air-gapped, cross-modal retrieval platform for national-security use cases; achieved 82% Precision@5 and 94% citation accuracy under sub-10s latency. [GitHub](#)

PIB Multilingual Video Platform (2026) – Led product development of a government press-release-to-video platform; achieved 94% speech synthesis accuracy and 87% user comprehension satisfaction. [GitHub](#)

5G AI Resource Allocation Simulator (2025) – Directed 50+ experiments evaluating product trade-offs (latency, fairness, throughput, QoE), delivering 300–400% throughput improvement over baseline. [GitHub](#)

Face Recognition System (2024) – Led development of a biometric identification platform (Python, OpenCV, Raspberry Pi) for missing-person identification workflows, achieving 92%+ recognition accuracy; awarded *Best Societally Relevant Project* for societal impact and innovation. [GitHub](#)

Publications

IEEE Publication (2026) – Published research paper on multilingual AI-driven media generation and intelligent automation workflows, based on the PIB Multilingual Video Platform initiative. [Research Paper](#)

Education

Presidency University, Bengaluru

2022 – 2026

B.Tech, Computer Science Engineering (AI & ML Specialization)

German Equivalent Grade (Uni-Assist VPD): 2.4

Certifications

Azure DevOps Fundamentals | Terraform on Azure | AWS Glue | Databricks Data Preparation Badge | Oracle Foundation Associate | MongoDB Vector Search | Git & GitHub
